

FLX Services Lab Bench

B r o c h u r e

FLX

Services Lab Bench

Description

Service integrated benching with scalable utility distribution.

The FLX Services Lab Bench brings together utilities, storage, and workspace in a single framework. Built on a component welded steel frame, it delivers the durability required for demanding lab environments while supporting efficient, organized layouts.

In a back to back configuration, a shared service spine supports two opposing workstations, reducing redundant infrastructure and improving space utilization. Single sided units can be extended by adding a second work surface and two additional legs, while each side remains independently height adjustable.

Utilities can be routed through overhead service panels or from the floor, supporting gas, water, power, and data. Integrated wire management and service raceways keep connections organized and out of the way.

Specifications (as shown)

- White phenolic surface
- White gloss powder-coat frame
- Raceway

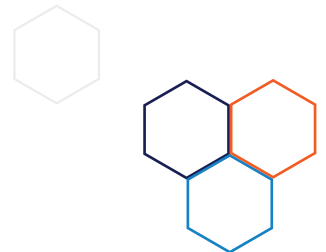

Width:

60"

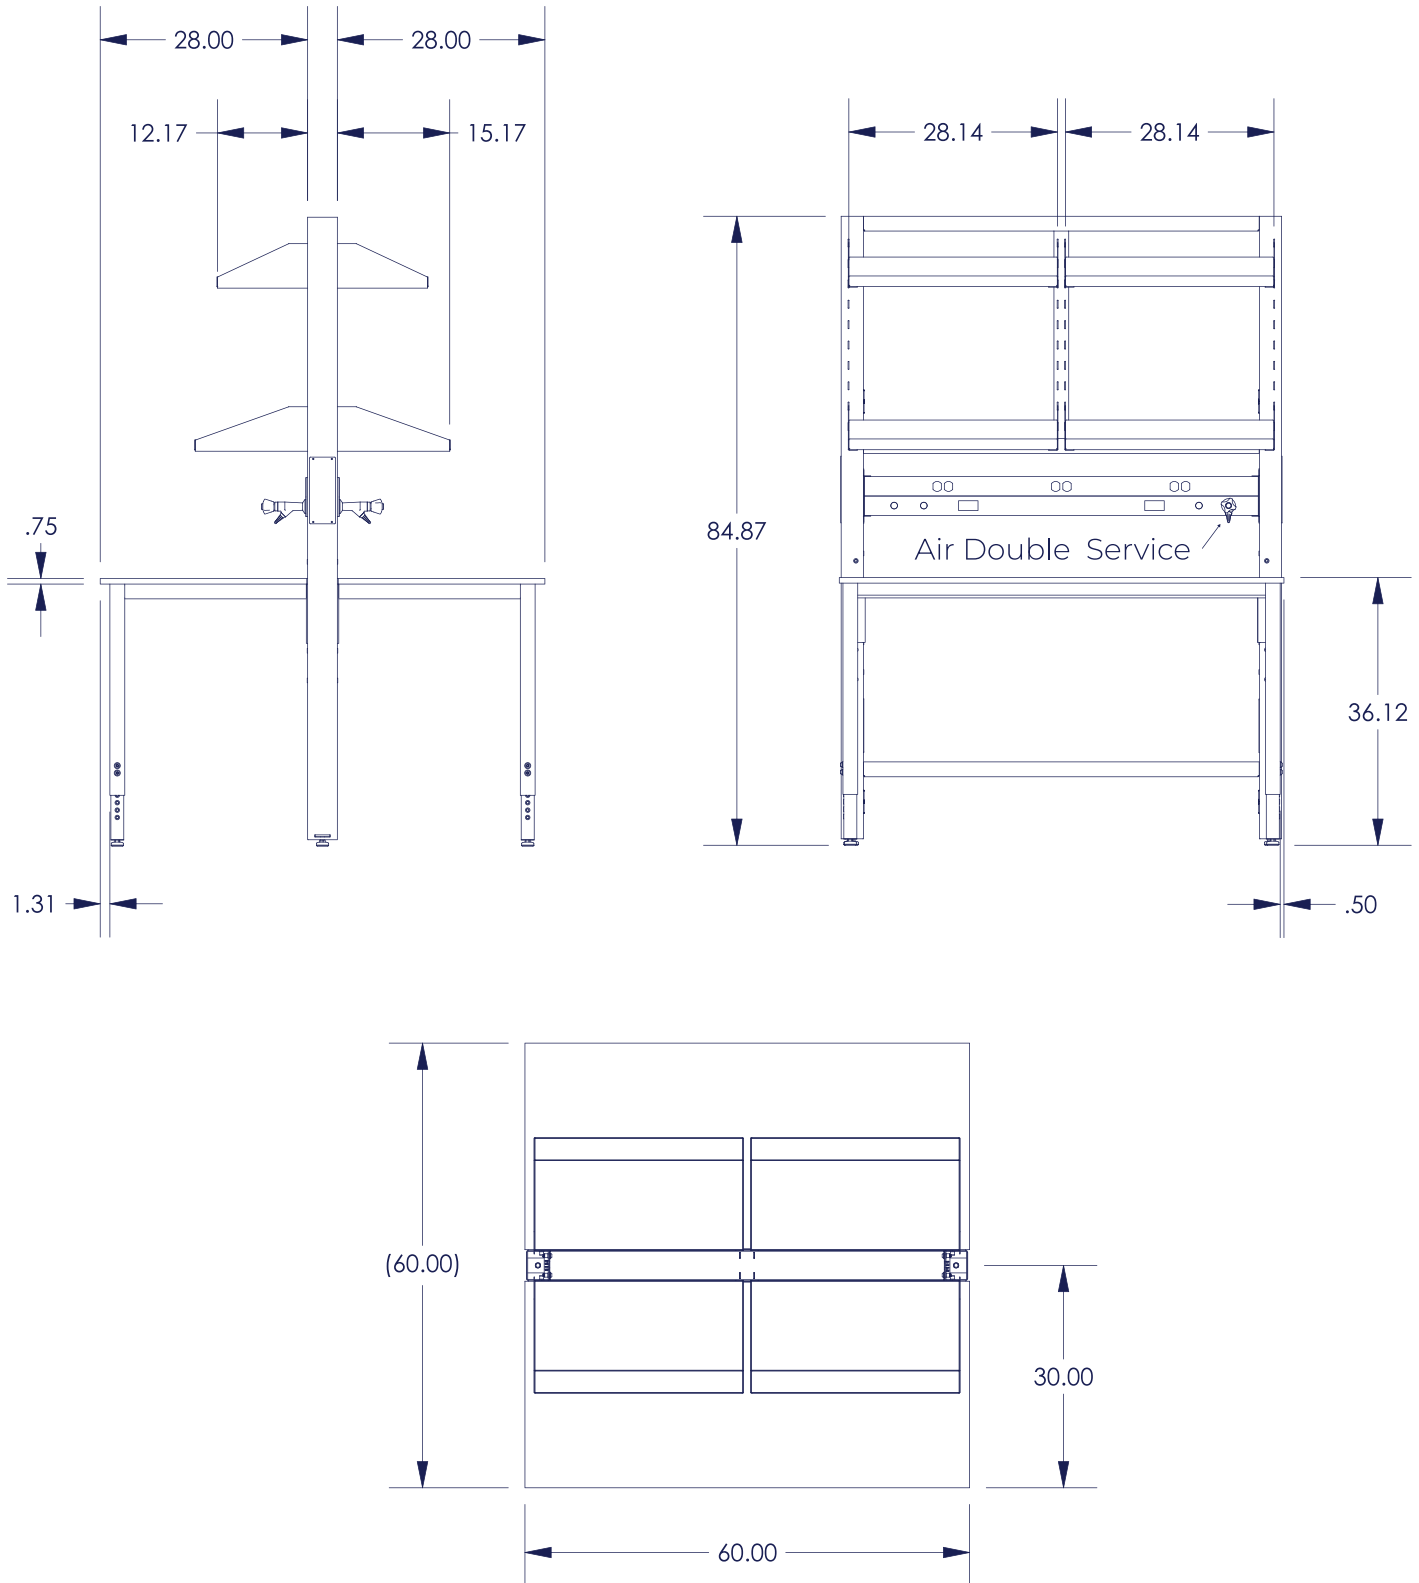

Depth:

30"

List Price: **\$40,315.00**

Drawings

Every project is different.

That's why we deliver at three levels — each with the same American-made quality, sourced and built in Austin, Texas.

STANDARD

Proven configurations from our catalog, ready to order and built to ship.

3 to 4 weeks

MODIFIED

Our standard platforms, adapted to your specific dimensions, finishes, or features.

4 to 5 weeks

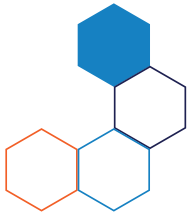

CUSTOM

Fully bespoke design and engineering for unique workflows and constraints.

6 to 12 weeks

*Subject to change based on supply. Confirm details with account manager.
